TECHNOLOGY SURVIVAL

Stop technology from derailing your lesson

TEST EARLY

Check the projector, sound and logins before students arrive.

KEEP OFFLINE COPIES

Save slides and resources locally, as well as in the cloud.

CARRY ADAPTORS

HDMI and USB-C adaptors solve most “it won’t connect” moments.

KNOW WHO HELPS

Find out who handles IT problems, and how to log a request.

FOLLOW ICT POLICY

Use approved platforms and storage, and never store student data on personal devices.

HAVE A NO-SCREEN START

A board-based opening task gives you time to troubleshoot.
