A convincing AI recommendation

ILLUSTRATIVE AI RESPONSE A · intentionally over-generalising · authored, not tested

> “Six students answered correctly, while four students demonstrated misconceptions about decimal place value. The main difficulty is that students treat decimal numbers as whole numbers and do not understand the value of tenths and hundredths.
>
> I recommend reteaching decimal place value to the entire class tomorrow, beginning with a place-value chart, followed by worked examples and additional comparison exercises.”

WORKED JUDGEMENT

Counts accurate; common-cause claim and whole-class response not established.

TEACHER ASKS

Would you follow this tomorrow? What responses, context or further evidence are needed?

Whole-class reteaching is not inherently wrong; it is not justified by these ten responses alone.
